

Hip Certification Information

Pennsylvania Hip Improvement Program (PennHIP)

The CEB-US provides the following hip certification information as a service to our members. Hip certifications listed are based on information provided by our members.

Distraction Index (DI) is a measure of hip joint laxity; it does not allude to a “passing” or “failing” hip score. There is an increasing risk of developing degenerative joint disease (DJD) as the DI increases; low risk when DI is close to 0.30, high risk when DI is close to 0.70 or above.
